

SKILLS SHOW STARTS WITH A BANG

Shane Mann **@Shanermann**

Standby for something different, was the key message organisers of the Skills Show 2013 conveyed during a dynamic opening ceremony.

Birmingham's LG Arena once again played host to the ceremony, on Wednesday November 14, which launched the start of three action packed days of skills competitions and show-

The ceremony had a touch of the X Factor this year. Caroline Flack, best known for her co-hosting of ITV's the X Factor, presented the Ceremony; which was watched by around 3,000 people, including competitors, providers, sector leaders and employers.

The audience were treated to a spectacle of performances.

Olympic Closing Ceremony performers STOMP (pictured top right) opened the ceremony with a ten minute, high-energy and inventive performance from their popular West End Show STOMP.

Students from Leicester College of Performing Arts provided a unique representation of vocational skills (pictured right displaying automotive skills) through drama and dance. From aviation to painting and decorating, this imaginative performance really captured the audience.

Performances were also given by the Parkour Athletes and Tiffany Theatre College.

During the hour long ceremony Shauni O'Neill, former national apprentice of the year 2011, provided an inspirational speech on her experience of vocational training. Shauni spoke of the incredible opportunities that her apprenticeship had given and the she hoped to be a future exec-

utive of Transport for London.

The centre piece to the ceremony was the competitors parade which saw all 700 parade together, according to their skill category. There were rapturous applause from the audience and recognition that this ceremony marked the beginning of a challenging three days competing.

Tonight's ceremony will open up a galaxy of opportunity, one which will truly spark the imaginations of young people.'

again, shine the light on the nation's skills.

The Skills Show is inspiring a new genera-

tion of people into further education, skills and

The official opening of the Skills Show was presented by Skills Funding Agency executive director, Marinos Paphitis, on behalf of the agencies' chief executive Kim Thorneywork. During his address Mr Paphitis said, "Now in its second year this unique event will once

Opening doors - without the stereotypes

In a period of high youth unemployment we need to do more to ensure industries are not presumed to be either for male or female says Kirstie Donnelly.

The Skills Show is an incredible experience. Everywhere you look there is something to

There are the competitors - the amazing, talented individuals who want to be crowned the best of the best in their chosen skill.

There are top employers who want to highlight some of the careers apprenticeships and vocational qualifications can lead to.

There are the FE colleges and representatives, who want to help people to reach their potential. And of course, there are the many thousands of young people who have been given the chance to 'have a go' and experience hundreds of different skills.

I've spent a lot of time absorbing the buzz of this year's Show. I can't describe the excitement and joy on people's faces. Yesterday, one of my colleagues overheard two young girls talking. One of them kept saying the same thing over and over: 'I'm having the BEST day'. Sums it up, really.

The Skills Show is not like any other event or careers fair, where you're just handed pamphlets and pens. It is an experience.

One thing that struck me was that in some sectors, it's still very much one sided in gender representation

Where else could you learn how to build a plane? Or try your hand at stage make up? Or have a go at bricklaying or TV presenting?

It's this kind of practical careers advice that really makes a difference to young people, and gives them the encouragement they need to pursue their career goals. It's not just the have a go opportunities that help. It's also the fact young people can meet those who have seen success through vocational education. They can hear their stories, relate to them and be inspired to follow in their footsteps.

One of my personal highlights from the event was the opening ceremony, when the competitors were presented to us all. The competitors are the life and soul of The Skills Show. To see them come out on stage so proudly was truly moving.

However, one thing that struck me was that in some sectors, it's still very much one sided in gender representation.

In the construction and engineering fields for example, there were very few female competitors. Likewise, where were all the men competing in beauty skills?

Competitors walk on stage during the opening ceremony.

•

What I'm saying may not seem particularly surprising to you.

But I hope you agree that it is concerning. Now, I don't mean that the competitors didn't deserve to be there – of course they do.

Neither am I saying we should have ensured equal numbers of men and women in each category.

At the end of the day, competitors should be the best of the best.

But when we have skills gaps in so many industries in the UK, alongside almost one million unemployed young people, we should be worried if industries are still regarded as 'male' or 'female'. Potentially talented individuals

may be put off their dream job out of fear they won't fit in or adhere to the right stereotype. This

Young people should feel comfortable enough to do whatever it takes to open the door to the futures they deserve.

And we need to help them. As a sector, we must overcome these age-old perceptions and show young people that they can do anything they want. We must remind them that nothing restricts their opportunities.

It's not something that can be achieved overnight. But there are some things we can do, no matter how small, that could really make a difference.

For example, we should do even more to celebrate exceptional individuals who have succeeded through the vocational route – particularly when they have overcome stereotypes or barriers to succeed.

At the opening ceremony, ex-Transport for London apprentice, Shauni O'Neill (pictured left), shared the story of her City & Guilds apprenticeship in what is often perceived as quite a male-dominated industry.

As role models go, they don't come much better than her.

She has never let anything stand in her way and she openly talks about how she wants to reach the very top of her industry. And what's more, you really believe she is going to be there one day.

This year at The Skills Show, City & Guilds' core focus is around opening doors.

We want young people to experience the show and take that first step towards a big, bright future.

And this doesn't end at the Show.

Once it's over, we need to continue working together to challenge perceptions and inspire confidence; confidence that makes people think, 'I can do that,' and 'this is the job that's right for me.'

Kirstie Donnelly MBE is the UK Managing Director for City and Guilds

WORLDSKILLS NATIONAL COMPETITIONS

Rebecca Cooney **@RebeccaKCooney**

t the centre of the Skills Show, reers advice, around 700 competitors are carving, soldering and programming their way to winning medals in the national finals of World Skills UK.

Skills competitions are the national championships for professional or craft trades, with over 74 competitions in everything from bricklaying to popular music.

Competitions at the Skills Show are the culmination of months of regional contests across the UK, with the top scoring regional champions vying not only to be national champion, but also for the chance to take part in the world finals in Sao Paulo in 2015

In this year's WorldSkills competition in Leipzig, team UK scooped golds in bricklaying and cabinet making as well as a clutch of silver and bronze medals.

For training managers and judges, the hunt is on to find talented youngsters who can match or even beat those results.

The different skills are divided into

Alistair Mason, aged 28, gold medal winner in advanced stone masoney from Weymouth College.

Built environment includes competitions in bricklaying, cabinet making, carpentry, electrical installation, environmental science, heating and ventilation, joinery, landscape gardening, painting and decorating, plastering and dry wall systems, plumbing, refrigeration, roofing, stonemasonry and wall and floor tiling.

This category produced Team UK's two gold medals in the bi-annual WorldSkills competition in Leipzig this year, one for cabinet maker George Callow, and one for Ashley Terron in bricklaying.

Observing training manager for cabinet making Christian Notley said: "The pressure is on for me now, because I was new last year, so I've got to prove it wasn't just a fluke. But as not every country has a dedicated cabinet making team, some use joiners or carpenters, and the UK is good at cabinet making, we should be doing fairly well."

Christopher Woodley aged 31, gold medal winner in architectural glass from Swansea Metropolitan University.

The cultural and creative arts category includes competitions in architectural glass, fine jewellery making, floristry, games development, popular music, video moving image and web development.

This is the first year that the fine jewellery making competition has been part of the Skills Show, and training manager Steven Jinks said he thought getting involved had been the right choice for the competitors.

"There are a lot of distractions and it can

really faze some people but it's similar to WorldSkills so they'll know what to expect," he said.

"They are learning from each other and hopefully it gives them a sense of community."

Following an exact specification, the competitors must create a piece of jewellery from 18 carat gold.

"All the gold used goes back to the suppliers afterwards and some of it will be lost as gold dust but usually there's very little difference."

Struan Robertson, aged 21, gold medal winner in higher sheet metal work from Babcock International.

ngineering includes competitions in aeronautical engineering, automotive body repair, automotive painting, automotive technology, CNC milling, CNC turning, construction metal work, industrial control, industrial electronics, mechanical engineering, mechatronics, mobile robotics, sheet metal technology and welding.

Automotive painting judge Ben Eaton earned himself a bronze medal at the 2011 WorldSkills final in London and now works for Mercedes-Benz. "I just loved it," he said.

"I hadn't really thought about judging but we'd done it as part of our training, so you know what judges are looking for, and when I got too old to compete, I thought, well why not?"

As a former contestant, he knows exactly what his competitors are going thorugh.

"What we're looking for is that they do everything in the right order, as much as the finished product," he said. "When you see one of them make a mistake, you really want to help them out but you can't."

Kim Reid, aged 18, gold medal winner in IT software solutions for business from New College Lanarkshire.

SOCIAL AND PROFESSIONAL SERVICES

T and business administration includes competitions in accounting technician, apprentice business challenge, Cisco network technician, IT network security, Microsoft applications specialist, Microsoft IT technician and Microsoft network administrator.

In the network systems administration competition the 37 competitors are tested on their skills at configuring and administrating a Windows 7 and a Windows Server 2008-based network.

"It's been a great competition with some talented young men and women," said training manager Kevin Large.

"What's great is we're seeing skills above and beyond what you'd expect to see being taught in college, which means colleges are really taking onboard the WorldSkills training role to provide fantastic support."

What judges were looking for, Kevin said, were students with consideration technical skills, able to work to a high level of perfection within strict

He added: "We're definitely seeing students with considerable potential to go forward to Brazil and some of them only about 18 or 19."

Social and professional services includes competitions in aromatherapy, beauty therapy, caring, culinary arts, forensic science, hairdressing, health and social care, media make-Up, nail art, nail enhancement, patisserie and confectionery, professional restaurant service and reflexology.

Over in the beauty section, hairdressers snipped, nail artists glued on extensions and green-painted models waited for the next layer of their media make-up.

"It's been a fabulous competition," said beauty therapy competition manager Valerie Kay.

"The students have really enjoyed themselves, we've had a wonderful time and they've done a brilliant job.

"All the way through, we've been to some great colleges, and when you're supported by the college and the principal, it makes all the

Based on past performance, Valerie said she was optimistic for Team UK's chances in Sao Paulo.

"We've never come lower than a fourth," she said. "Although it's been a while since we've had a gold so it'd be nice to do that this time around."

OUR MANN HAS A GO AT THE SKILLS SHOW

ave a Go activities are a big part of the Skills Show. They allow people to try their hand at a skill, trade or occupation from horse riding to baking to pasta making to horse riding. FE Week's Shane Mann spent the day working his way through a fraction of this year's Have a Go's.

Pictures: "Our Mann" Shane Mann, Director of Operations at FE Week Having a Go at: 1) the National Institute of Adult Continuing Education's new interactive Maths app with chief executive David Hughes, 2 & 3) going back to his Norfolk roots with tractor driving and horse riding with Bedford College, 4) trying a racing car built by Stephenson College students for comfort, 5) floristry with North Warwickshire and Hinkley College, 6) biscuit decorating with Bourneville College, 7) making a bird box with Burton and South Derbyshire's Ady Cluclas, 8) tightening up a ventilation system with Lucy Hargrave on the City and Guilds stand, 9) pasta making with Walsall college's Steve Biggs and 10) jewellery making with Holts Academy. PERFORMANCE AND MEDALS AT CLOSING CEREMONY

Shane Mann @Shanermann

After three challenging days for competitors it was time to down the tools and celebrate what had been achieved at the Skills Show 2013.

The focal point of the closing ceremony, held at the LG Arena in Birmingham's NEC, was the announcement of the medalists in the World Skills UK finals.

TV personality Will Best, best known for presenting Channel 4's, T4, hosted this year's ceremony.

Mr Best began by listing some of the highlights from this year's show which included visits on Thursday from the Deputy Prime Minister, Nick Clegg and HRH the Princess Royal on Friday.

Before the medal ceremony, Mr Best introduced a video about the success of Team UK at World Skills 2013. The team were met with a standing ovation and few dry eyes as they walked on staged and took their seats in the arena.

It was a reminder to all competitors of what they could achieve.

For the competitors the past few months will have seen them endure some tough testing and up-skilling, in preparation for the finals.

Emotions were high as everyone waited to learn whether the hard work had paid off.

There were screams of joy, jumping in the air, tears and relief as names appeared on the screens and Will Best announced what they had won.

Landscape Gardening gold medalist Daniel Handley, 26, from Sparsholt College was in a state of disbelief when he discovered he had won.

"To be presented with my medal in front of everyone at the NEC this evening has been amazing. "Taking part in the WorldSkills UK competitions has allowed me to build on my knowledge and practical

and practical skills and has helped me progress further in my career in landscape gardening.

"If I'm honest it hasn't

WorldSkills 2013 Team UK gold medalist Ashley Terron congratulates winners in the professional services category

really sunk in yet that I have won gold!"

Ceremonies were paused briefly whilst Students from Leicester College of Performing Arts provided another energetic dance performance (pictured top).

City and Guilds' World Skills manager, Michael Osbaldeston, gave an opening speech which he used to congratulate all those who had competed and reminded them that their skills journey need not end at this point.

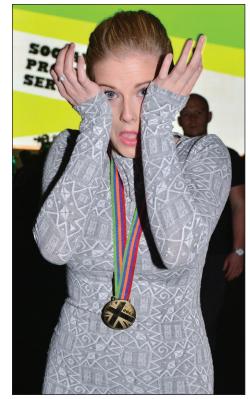

"Tonight's ceremony is about recognising the achievements of the competitors. They have fought valiantly in nearly every skill you could possibly imagine. Congratulations to all of the finalists.

"Congratulations to all of those bronze, silver and especially those gold medalists. You are an amazing inspiration. Good luck on the rest of your skills journey."

Mr Osbaldeston added, "Wow what an amazing few days. City and Guilds are proud to have been a premier sponsor of such an amazing event and on behalf of all the premier

sponsors I want to say thank you and well done to all those who ensured this year's show was great."

Following the ceremony medalists, competitors, friends, family and all those that supported and worked on the Skills Show, finally got to relax and celebrate at the after show party, The Big Celebration.

A tearful Eleanor Bartley, aged 20, from North Hertfordshire College, wins a gold medal in reflexology.

HELPING YOU TO RAISE STANDARDS

Visit us at the AOC Annual Conference, Stand 50 and attend our breakout session 1.7 'Do we need a Vocational Pedagogy?' at 2:30pm
